

Finding the Right Match: UBC Okanagan Gift and Estate Planner Barbara Eyles works with donors to ensure their legacy gifts have impact

If I make a gift in my will, can I specify how the dollars are used in the future?

Yes, of course. You can direct an estate gift to the Okanagan or the Vancouver campus of UBC, or both, and even to a specific area on campus. I'd be happy to have that discussion with you. One can never know what a campus' specific needs will be years in the future, but there are common needs across time, like student support, or enhanced facilities and new equipment.

What do you mean by student support?

This is a key area because it impacts our students directly. Usually it takes the form of funding for student awards: scholarships for academic or athletic achievement, or bursaries based on financial need. You can even choose what faculty you want to support.

At UBC, you can create an award endowment – where the capital remains intact and the interest is paid out as the student award. Continuing in perpetuity, endowed awards have the potential to have the most dramatic and longest-lasting impact on the lives of many students.

What about facilities and equipment?

In the Okanagan, as a young, growing campus, our infrastructure needs are continually evolving. But there will always be a new building project on the horizon or the need for the latest equipment or instruments for our labs and classrooms.

Through a conversation while you are updating your estate plan, we can design a legacy gift that is meaningful to you and provides unique impact to UBC and our students.
